Safety	Certifications Devices	ETL (UL 1995) PCB fuses, indoor unit terminal block thermal fuse, current transformer, over-voltage protection, crankcase heating, temperature limit protection logic, compressor overload sensing		

Certified in accordance with the AHRI Unitary Small Air-Source Heat Pumps (USHP) Certification Program which is based on the latest edition of AHRI Standard 210/240.

Proper sizing and installation of equipment is critical to achieve optimal performance. Split system air conditioners and heat pumps (excluding ductless systems) must be matched with appropriate coil components to meet ENERGY STAR criteria. Ask your contractor for details or visit www.energystar.gov

\*The Wind-Free™ unit delivers an air current that is under 0.15 m/s while in Wind-Free™ mode. Air velocity that is below 0.15 m/s is considered "still air" as defined by ASHRAE (American Society of Heating, Refrigerating, and Air-Conditioning Engineers).

Samsung HVAC maintains a policy of ongoing development, specifications are subject to change without notice. Refer to www.AHRIdirectory.org for current reference numbers.

(actual equipment appearance may vary)

#### eneral Information

The indoor unit shall feature "Wind-Free™" mode\*. In cooling mode, as room emperature nears set temperature, the unit will close its louver and will disperse air into the space through thousands of micro-holes on the front of he indoor unit preventing cold air drafts on occupants.

The indoor unit shall have Wi-Fi capability as standard Outdoor unit shall provide 208/230V power to indoor unit via 14 AWG X 3 nterconnect power cable

#### onstruction

ndoor unit chassis shall be UL94 V0 with a galvanized steel mounting oracket

The indoor unit shall have easy-access to wire, pipe, and drain connections via access panel on the bottom of the unit for simple installation and service The outdoor unit shall be galvanized steel with a baked on powder coated inish for durability

#### eat Exchanger

The heat exchangers shall be mechanically bonded fin to copper tube

#### efrigerant System

The compressor shall be hermetically sealed, inverter controlled, BLDC Rotary Refrigerant flow shall be controlled by an electronic expansion valve at the outdoor unit

#### door Fan

The indoor fan shall be a single, antibacterial cross-flow type

Three fan speed settings and auto setting Automatic (motorized) vertical swing (up/down) and horizontal swing (left/right)

#### ontrols

The system shall have a built in Wi-Fi adapter as standard to allow control and monitoring using the Samsung SmartThings app (Android, iOS) Dual set temperature support when connected to MWR-WG00UN Advanced Wired Controller.

The indoor unit shall have a simple connection for overflow detection devices or any other normally closed contact for simple unit shutdown

- The indoor unit shall ship with a wireless controller, holder, and batteries Wired controller options available
- Samsung central control compatible (MIM-R10UN accessory required)
- Interconnect control wire between outdoor and indoor unit shall be 16AWG X 2

#### onvenience

System energy consumption can be viewed using the Samsung SmartThings mobile app or on the indoor unit display using the included wireless controller\*\*

- •AI (artificial intelligence) Auto Mode technology monitors factors such as indoor temperature, outdoor temperature, set temperature, and operating time to learn the patterns within your home to automatically adjust system operation to maximize occupant comfort and efficiency (Wi-Fi connection required)
- ·Eco Mode to reduce energy consumption during low demand operation ·Smart install mode - startup system diagnostics operation to ensure system
- readiness during initial operation • Auto restart
- Auto Clean Function
- •7-segment digital display on front of unit to display temperature and unit status • "Fast" mode to quickly reach set temperature
- Auto changeover
- Good sleep mode
- Quiet mode
- Dry mode
- Simple ON/OFF time function Using the wireless controller specify the ON and/or OFF times
- · Electro-static, washable, main filter as standard accessible from the top of unit ·Filter cleaning reminder
